DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation “varying levels of support” is unclear as to the structure being claimed. The examiner suggests recitation the structure for causing the various levels of support. The recitation “the use of” should be deleted as it is confusing.

Re claim 19, it is unclear as to the structure being claimed since applicant is reciting method steps. The examiner suggests writing the claim as a method for making the undergarment.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Perron et al. (5787732).

Art Unit: 3765

Perron et al. (5787732) teaches the undergarment as claimed including “varying levels of support” to sculpt the buttocks, thighs, saddlebag, hip, tummy areas or a combination thereof wherein lighter supportive (20N) are gradually blend into heavier supportive regions (30N); and sheer areas of relief uncompress buttock cheeks (3); and the use of elastic shirring (8)sewn down the center back seam co-act to assist shaping and lifting first and second buttock cheeks. Re claim 2, note that varying levels of support are achieved through selected stitch formation and denier. Re claims 19-21, the process of making is not germane to the patentability of the product itself. Even so the note that Perron et al. (5787732) contains the welt (2) as claimed.
